

Manufacturing Equipment Technician

We're looking for a talented Manufacturing Equipment Technician to join our Industrial Engineering team. This role is responsible for ensuring the safe and competent assembly, testing and commissioning of production equipment and to provide a timely and effective response to maintenance and calibration requests.

Key responsibilities

- Maintain the Production equipment
- Prepare maintenance and calibration plans and manuals
- Define spare parts and ensure stock levels are set
- Provide a timely breakdown service
- Review breakdowns and modify equipment and processes appropriately
- Provide Production with equipment for use in the manufacture of WSS and subsequent products
- Liaise with users and vendors to specify and procure all parts necessary to complete the rig construction
- Organise with mechanical and electrical technicians/contractors to construct the rigs to the commissioning stage
- Liaise with Process engineering to ensure trouble free commissioning and handover
- Liaise with Process Engineering specialists and Production users to continually improve to improve yield and output

Education and necessary skills

- Degree or diploma in Mechanical, Electrical or Mechatronics Engineering (or equivalent experience)
- Strong knowledge of production maintenance, calibration practices and reliability engineering principles
- Experience developing and executing preventative and corrective maintenance plans, including documentation of procedures and manuals
- Clear and concise documentation, reporting, and handover skills.
- Hands-on experience in a manufacturing or cleanroom environment
- Knowledge of lean manufacturing, reliability-centered maintenance, and/or continuous improvement methodologies (e.g., Six Sigma, 5S)

If this sounds like you and you are looking to work for an industry leader with a down-to-earth yet professional environment, then this is the job for you!
